Banking Law In Australia 6th Edition Lexisnexis

Banking and finance law is a complex field of practice, with different financial activities regulated by specific pieces of legislation. For example, banks must abide by the Banking Act (1959) as well as a code of practice produced by the Australian Banking Association. When financial institutions violate the law, they 're liable to face investigation by regulatory bodies such as the Australian Prudential Regulatory Authority (APRA), the Australian Competition and Consumer Commission (ACCC ...

Banking and finance law area of practice | GradAustralia

Private bank notes and treasury notes continued in circulation until 1910, when the federal Parliament passed the Australian Notes Act 1910 which prohibited the circulation of state notes as money and the Bank Notes Tax Act 1910 imposed a prohibitive tax of 10% per annum on 'all bank notes issued or re-issued by any bank in the Commonwealth ... and not redeemed'. These Acts put an end to the issue of notes by the trading banks and the Queensland Treasury.

This book is a successor to Robin Burnett's Law of International Business Transactions. It provides an up-to-date analysis of the legal environment for international trade and covers:the changes made to payment and letters of credit by reason of the adoption of the UCP 600, which became effective in 2007, and other means of payment which are currently used;the provisions and possible adoption of the UNCITRAL Draft Convention on the Carriage of Goods Wholly or Partly by Sea;recent developments in the law relating to international sale of goods;the question of international arbitration and other means of dispute resolution; andthe strategies and issues of international operations while incorporating and building on the comprehensive information and material in the previous book.It will assist practitioners and students in their understanding of the legal and practical aspects of international and overseas trade and operations.

Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of the law covering merchants' status and obligations – including the laws governing state intervention in economic activities – in Australia provides quick and easy guidance on such commercial and economic matters as business assets, negotiable instruments, commercial securities, and regulation of the conditions of commercial transactions. Lawyers who handle transnational business will appreciate the explanation of local variations in terminology and the distinctive concepts that determine practice and procedure. Starting with a general description of the specifically applicable concepts and sources of commercial law, the book goes on to discuss such factors as obligations of economic operators and institutions, goodwill, broker/client relations, commercial property rights, and bankruptcy. Discussion of economic law covers the laws governing establishment, supervision of economic activities, competition law, and government taxation incentives. These details are presented in such a way that readers who are unfamiliar with specific terms and concepts in varying contexts will fully grasp their meaning and significance. Thorough yet practical, this convenient volume is a valuable tool for business executives and their legal counsel with international interests. Lawyers representing parties with interests in Australia will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative commercial and economic law.

This book looks at the UK banking in the context of general legal doctrines and banking regulation. It draws on Australian, US and Canadian examples and deals with the impact of the recent global financial crisis.

Up until the global credit crisis in 2008, 'Financial Services' was the fastest growing sector of the Australian economy. This growth has had profound implications for individuals, corporations and government. Following extensive review in the last part of the twentieth century, Australia put in place an overarching system for regulating all financial services, replacing a system that was based on separate regulation of products in individual industries. Focusing on the implications of the new system for retail clients - 'financial citizens' - Financial Services Law and Compliance in Australia provides a comprehensive account of the regulatory structure and a detailed analysis of the legislative framework, including discussion of the new regulatory bodies, the new licensing requirements for those wishing to enter the financial services market and the new obligations for those marketing or offering financial services to the public. This is an essential resource for those working in, and advising on, financial services, for students of financial services law, and for anyone needing to understand this new regime in Australia.

Since the 1980s, waves of neoliberal ' economic reform ' have transformed Australia. Privatisation, deregulation, marketisation and the contracting out of government services: for three decades now, there has been widespread agreement among policymakers on the desirability of these strategies. But the benefits of economic reform are increasingly being questioned. Alongside growing voter disenchantment, new voices of dissent argue that instead of efficiency and improved services, economic reform has led to unaccountable oligopolies, increased prices, reduced productivity and degradation of the public good. In *Wrong Way, Australia* ' s leading economists and public intellectuals do a cost – benefit analysis of economic reform across key areas. Have these reforms been worthwhile for the Australian community and its economy? Have they given us a better society, as promised? ' Has privatisation led to more productivity-enhancing competition? Has deregulation increased economic welfare in energy, finance, health, education and labour markets? Does the lived experience of Australians measure up to the promise of economic reform? The authors answer these questions with conclusions that are both compelling and disturbing. ' —Emeritus professor Roy Green, University of Technology Sydney Damien Cahill & Phillip Toner on Economic Reform Stephen Duckett on Private Health Insurance Elizabeth Hill & Matt Wade on Early Childhood Education And Care Phillip Toner on Vocational Education And Training Jane Andrew & Max Baker on Prisons Bob Davidson on Aged Care Paul Davies on Public Sector Engineering Sue Olney & Wilma Gallet on Employment Services John Quiggin on Electricity Jim Stanford on Labour Markets Evan Jones on Banking Peter Phibbs & Nicole Gurran on Housing Lee Ridge on The NBN Ben Spies-Butcher & Gareth Bryant on Universities Michael Beggs on Monetary Policy And Unemployment John Quiggin on Productivity Peter Brain on Orthodox Economic Models Patricia Ranald on Free Trade David Richardson on Foreign Investment Frank Stilwell on Inequality
